- Pennsylvania State Rep. Sam Rohrer's Reference Letter
- Oklahoma State Rep. Charles Key Reference Letter
- Action Sheet

# YOUR BODY IS YOUR ID

Problems, answers and legislative solutions

## Enrolling the world into a single global biometric ID system

The world is being enrolled into a single global system of identification and financial control. One's body is now directly linked to the control of financial transactions through biometric ID, an international ID system that uses computers to automatically identify individuals based on unique physical characteristics, such as a facial image.

Facial recognition and digital fingerprinting are common forms of biometrics. Almost all states and nations now use biometrics to identify their residents.

Facial recognition creates a digital map of the face

Facial recognition software uses a high-resolution photo to create a digital “map” of the face. This “map” is linked to other personal data (name, Social Security number, etc.) to create one's unique biometric identity. A photo, collected for a driver license/ID card (DL/ID card) or passport, can be used to deceitfully enroll individuals into a global ID system, over which they have no control, and that can be used to identify and track individuals, in public, using surveillance cameras. Once identified, programs, such as “Project Hostile Intent,” may also be used to “judge behavior” and determine if the individual is a potential “threat” to society.

To create a global biometric system, states and nations must:

1. Enroll their citizens (DL/ID cards, passports, national ID, school ID, etc.)
2. Adopt international standards for documents, photos and data sharing
3. Link databases for global information sharing, global ID-tracking and surveillance

Such a system is the goal of the Department of Homeland Security (DHS), according to Robert Mocny (DHS US-Visit), who stated that *“information sharing is appropriate around the world,”* and DHS plans to create a *“Global Security Envelope of internationally shared biometric data that would permanently link individuals with biometric ID, personal information held by governments and corporations.”* Database sharing turns State ID into global biometric ID.

## DRIVER'S LICENSE or PASSPORT = GLOBAL BIOMETRIC ENROLLMENT

Driver's License with Facial Recognition Biometrics

ICAO's Biometric e-Passport Logo

Enhanced Driver's License - Facial Recognition - RFID chip – used as a DL/ID-passport for border-states

ICAO Logo – ICAO is part of the UN

EU e-Passport with biometrics, RFID chip and ICAO biometric e-Passport Logo

US e-Passport with biometrics, RFID chip and ICAO biometric e-Passport Logo

**RFID** - Biometric ID is linked to RFID (radio frequency identification) technology. RFID chips are often used in biometric documents, such as Enhanced driver licenses and e-Passports. RFID devices are commonly used for product ID, animal ID and turnpike passes, but in personal ID, the devices contain personal-biometric data or a personal-biometric RFID number. These devices will transmit the stored data when scanned, which raises serious privacy, fraud and ID theft concerns.

A global biometric system is ineffective, unless there is total global enrollment. National sovereignty is replaced by international laws, converting our “unalienable rights from God,” into “tolerated privileges.” States’ rights, privacy and religious freedom are under attack, especially in view of new technologies, such as the Somark RFID ink “tattoo,” or “RFID mark,” that can be used on humans, who would already be enrolled into a global biometric system of control.

For the first time in history, a single global system of ID and financial control is possible. Multi-national businesses, governments, law enforcement agencies and international organizations such as the ICAO (International Civil Aviation Organization-an agency of the United Nations) and AAMVA (American Association of Motor Vehicle Administrators) are working in harmony to impose this system on all nations while keeping the people and even lawmakers in the dark.

**How did this happen?** Dating back to 1986, federal laws have tried to impose biometrics on state ID. After 9/11 such efforts were fast-forwarded, resulting in federal legislation such as the “REAL ID ACT of 2005,” the proposed “PASS ID ACT of 2009” and the ICAO’s “E-PASSPORT” system. Legislation becomes law and the rules for the laws are often issued by a government agency, such as DHS. It is in the rules where we see the influence of international organizations pushing biometrics on our nation. With little or no government transparency or oversight, implementation of these rules directly attacks the rights of all, regardless of one’s political party.

**ACTION – States have the power! People are already enrolled in DL/ID card databases. International standards are in place, but States can erase personal-biometric data, before it can be shared globally.** Use this document to inform State and U.S. lawmakers of the problems and solutions. Email “Stop REAL ID Coalition” for digital documents and legislation. Share this document with pastors, religious organizations, privacy groups and political groups but especially with lawmakers. **Ask lawmakers to author or support legislation that will:**

- Ban participation in REAL ID, PASS ID and other federal standards for state issued ID
- Ban the use of biometrics
- Reduce DL/ID card photo resolution so photos are less compatible with facial recognition
- Wipe existing biometric information (fingerprints/high-resolution photos-active & backup)
- Restrict access to driver license databases, by law enforcement, to one name-one record, preventing facial recognition searches of the all records, and preventing “Federal Fusion Centers” from accessing state records for the purpose of global sharing
- End participation in federal or state programs that collect a SSN for DL/ID cards
- Create a State-to-State data sharing system (not AAMVAnet, an international system)

Stop Real ID Act Coalition  
7308 F 37<sup>th</sup> Terrace South  
Independence, MO 64055

Dear Mr. Lemer,

I want to take this opportunity to thank you and the Stop Real ID Act Coalition for the work that you have done to bring the Real ID Act to the forefront of public awareness and for your work in bringing together the ACLU and the ACLJ on this matter.

The Real ID Act of 2005 is a matter of grave importance to all citizens of this great country. This law establishes a National Identification system, and in effect an International system, requiring the states to store and share significant pieces of very personal and private information, including biometric data, on all of our citizens and opens the door to widespread identity theft and significant invasions of privacy. The final regulations issued by the Department of Homeland Security on January 11, 2008, have done little to respond to the legitimate concerns of the individual states and the citizens of those states.

Dozens of groups from every segment of society and the political spectrum have joined to rise in opposition to this onerous law. Last year seventeen states, including Pennsylvania, passed anti-Real ID bills or resolutions in their legislatures, while fourteen states currently have legislation pending. This bipartisan support is evidenced here in Pennsylvania by the 73 cosponsors, both Republican and Democrat, of House Bill 1051, which withdraws Pennsylvania from compliance with Real ID.

You, along with the Stop Real ID Act Coalition, have been instrumental in bringing awareness to the citizens, including lawmakers at the state and federal level. I appreciate that you have been working, not only in my state of Pennsylvania, but in all the states to raise public awareness and to work directly with the individual state legislators. In addition you have met with the leaders of national organizations to rally their support, as well as bringing evidence of wrongdoing in the biometrics community to various committees in Washington, D.C.

Again, I am pleased to have this opportunity to thank you and the Stop Real ID Act Coalition for all the work you are doing and would encourage the public, media, and state and federal legislators to take advantage of the information and insight that you and your organization have on this critical subject.

Sincerely,

Samuel E. Rohrer  
State Representative  
128<sup>th</sup> Legislative District

SER/bj

February 11, 2008

Mr. Mark Lerner, Co-Founder  
Stop Real ID Coalition  
17308 East 37th Terrace, South  
Independence, MO 64055

Dear Mr. Lerner:

I want to take this opportunity to thank you and the Stop Real ID Coalition (Coalition) for your part in bringing together the American Civil Liberties Union (ACLU) and the American Center for Law and Justice (ACLJ) on the matter of the Real ID Act 2005. Many state legislators across the country are working to not only insure each of our own individual states do not comply with the Real ID Act 2005, but that the federal government repeals the act, altogether.

The Coalition has been instrumental in bringing the Real ID Act to the forefront. Many, if not most people, including lawmakers at both the state and federal level, do not appreciate the serious consequences the implementation that the Real ID Act would have on both a national and international level.

The state of Oklahoma, as well as other states, have been working to insure public awareness. I appreciate that you and the coalition have been working directly with state legislators across the country. Thank you for also meeting with national organizations rallying their support.

Mark, I know you have evidence of wrongdoing in the biometrics community and that you have provided this evidence to various committees in Washington, D.C. I applaud you for that.

By this letter, I want to personally encourage the public, state lawmakers, the media and those in Washington D. C. to take advantage of the information and insight you and the coalition have on the subject of the Real ID Act of 2005 and look more critically at the serious problems that the Real ID Act of 2005 creates.

Sincerely,

A handwritten signature in cursive script that reads "Charles D. Key".

Charles D. Key

# **The STOP REAL ID COALITION**

## **Stopping Biometrics, the REAL ID ACT of 2005, and the proposed PASS ID Act**

We are Protecting Your • Religious, Privacy and States' rights • Rights of Representation and Redress • State and National Sovereignty

### **• BIG PROBLEMS –BIG SOLUTIONS**

The REAL ID ACT of 2005, and the proposed PASS ID Act, places the design and control of state issued ID documents in the hands of international organizations, enrolling U.S. citizens into a single global biometric ID system. Since this issue threatens all U.S. citizens, we bring people together to solve this problem. We are involved in legislation in several states, working with conservatives and liberals, nationally recognized legal organizations, churches, State Legislators, Governors, U. S. Congressmen, Senators and various oversight committees. Our goal is to preserve the most precious liberties shared by all. Most importantly, we work with individuals, empowering them to end 22 years of bureaucratic lies and deception used to impose biometrics, and more recently, the REAL ID ACT of 2005, and the latest attack: the PASS ID Act, on a free people.

### **• WE NEED YOU!**

**EDUCATE**–Read the materials attached. Call or email with questions (it is a complex issue). Inform your State and U.S. lawmakers, churches, denominations and ministries you support. Have them contact us.

**LEGISLATE**–Give copies of our documents to State and U.S. lawmakers! They are accountable! Follow up! Inform them! DON'T ASSUME THEY KNOW! Ask them to write/support legislation spelled out in our documents.

**COORDINATE**–Sign up for email updates. Be available to support legislation in your state. Lobby your Legislators and Congressmen –**MAKE THEM ACCOUNTABLE**. Find like-minded individuals (regardless of political affiliation) to create and execute a simple plan for lobbying and passing legislation.

**PARTICIPATE**–We need people to get involved directly with legislators, but we also need financial support. The COALITION works with large organizations, but we **DO NOT ACCEPT** financial support from those organizations. We only accept financial support from individuals. In this way, we maintain an uncompromising non-partisan position. Individuals can help financially by direct contribution or by arranging meetings with churches and political groups.

See below for contact information regarding additional information, to obtain digital documents, legislation or to contribute:
