## Identity Solutions for the REAL ID Act

Creating Trusted Security throughout the Driver's License Process

Our REAL ID Act solutions can also help you vet an applicant's identity before issuing them a driver's license – helping to fight identity fraud and theft. US State DMV customers using solutions from Viisage include:

- Arkansas
- Colorado
- Connecticut
- Delaware
- Florida
- Illinois
- Kentucky
- Maryland
- Mississippi
- North Dakota
- Oklahoma
- Pennsylvania
- Rhode Island
- West Virginia
- Wisconsin
- and more...

## A Complete Identity Verification Solution for REAL ID Act

Identity verification is a critical first step in provisioning a credential along with the privileges being requested. Our identity solutions work to provide both online and offline identity verification capabilities. Our solutions provide the software functions and hardware to retrieve, verify and validate information on a person and accompanying documents. Viisage's proofing process is uniquely focused on the person-document-data link; not just each element separately. The result is a determination that a person, their identity data and documents are authentic and valid.

### Meeting the REAL ID Act Requirements

Today's IDs incorporate sophisticated designs and security features that are overt, covert and also invisible to the naked eye. At the same time, forgeries are improving in quality and becoming harder to detect. Moreover, given the sheer volume and variety of federal and state, as well as foreign documents, it is virtually impossible for the DMV employees to effectively evaluate and stay current with applicants' identity without the aid of technology. Our solutions meet each of the specifications, and further provide instant analysis of a claimed identity using document authentication, biometric technology and verification of the person's information such as past addresses. This process allows jurisdictions to meet the REAL ID Act requirements without security breaches or slowing down the driver's license issuing process.

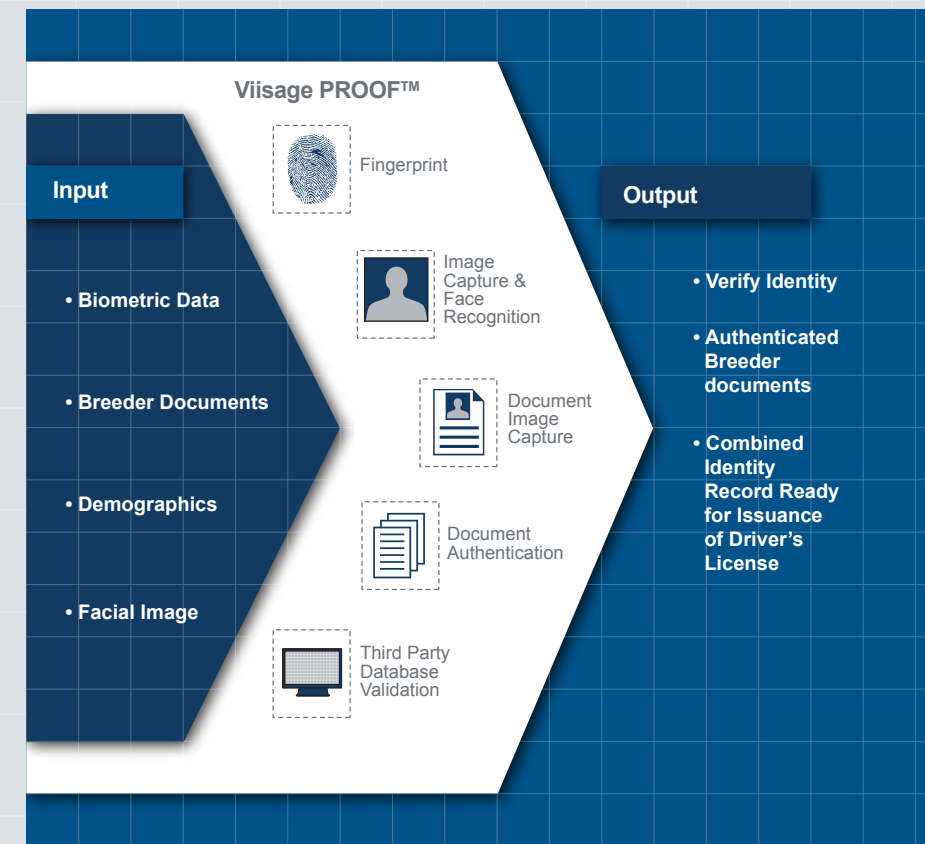

### From the Worldwide Leader in Identity Solutions

Viisage, a division of L-1 Identity Solutions, offers a comprehensive set of products and solutions for protecting and securing personal identities and assets. Leveraging the industry's most advanced multi-modal biometric platform for finger, face and iris recognition, our solutions provide a circle of trust around all aspects of an identity and the credentials assigned to it – including proofing, enrollment, issuance and usage. For over 15 years we've worked with DMV's to develop solutions that meet their needs. We've never missed an implementation schedule and everyday we strive to help our customers succeed.

### REAL ID Act Requirements Comparison

REAL ID Act Requirement	Viisage Capability
Document Image capture	Available
Document authentication	Available
Document validity (3rd party validation)	Available
*SAVE verification	Available
Biometric records capture	Available

\*SAVE = Systemic Alien Verification Entitlement

Viisage PROOF™ for REAL ID Act

Viisage proofing analytics are an integrated and intelligent proofing recommendation based on multiple data sources (breeder documents, ID, biometrics, address and phone number verification and other internal and external databases). This analysis of multiple data sources combines to create a highly accurate method to verify an individual's identity.

### REAL ID Act Compliance

#### Going Far Beyond Document Capture

- Our solutions are specifically designed to provide you with a trusted link between your customers and their identity documents – before you issue a driver's license. This includes scanning and authenticating documents, third party database searches and creating a traceable audit trail.

#### Integrated Digital Biometrics Capture

- Our biometric solutions have a proven track record of helping DMVs to verify the identity of every customer getting a driver's license. With face recognition, fingerprint, and iris capture solutions, Viisage is the right choice when it comes to biometric verification for your DMV.

#### Driver's License Enrollment & Issuance

- Our credential team has designed over two thousand card types and is committed to working directly with our customers to create a leading edge driver's license card.
- Viisage's Digital Imaging Workstations are capable of completing the application process from start to finish: including the production of a finished driver's license.

- Whether in an over-the-counter or central printing system, Viisage's solutions help you manage everything from secure inventory management to advanced investigative tools.

## Case Study: One of the Major States on the East Coast Takes a Complete Approach to Proofing an Individual's Identity and Eliminating Fraud with Face Recognition

### Ahead of the Curve with the REAL ID Act Compliance

Following the instances of fraud in the driver's license issuance processes, one DMV customer decided to design, develop, and implement a new digital drivers' license system. It also needed to have a supporting process that authenticates the credential and ties the individual to this driver's license through biometrics and external data.

Viisage worked with the DMV team to create highly secure and efficient driver's licensing system throughout 38 issuing offices across the state. The state deployed Viisage's unique intelligent proofing analytics and document authentication technology to verify an individual's identity before issuing a driver's license.

To provide a complete end-to-end security process, the DMV adopted Viisage's face recognition matching technology to verify that the applicant's image matches a stored image in the database

Today, Viisage's innovative digital imaging workstations allow the DMV administrators to issue a driver's license in 6-8 keystrokes, and the identity proofing process combined with the face recognition matching allows the state to eliminate the instances of identity fraud and issuance of multiple IDs.

### About L-1 Identity Solutions

L-1 Identity Solutions (NYSE: ID), formed in 2006 from the merger of Viisage and Identix, offers a comprehensive set of products and solutions for protecting and securing personal identities and assets. Leveraging the industry's most advanced multi-modal biometric platform for finger, face and iris recognition, our solutions provide a circle of trust around all aspects of an identity and the credentials assigned to it – including proofing, enrollment, issuance and usage. With the trust and confidence in individual identities provided by L-1 Identity Solutions, government entities, law enforcement and border management agencies, and commercial enterprises can better guard the public against global terrorism, crime and identity theft fostered by fraudulent identity. L-1 Identity Solutions is headquartered in Stamford, CT. For more information, visit [www.l1id.com](http://www.l1id.com).

## Results:

- Ensure national security with thorough identity proofing
- Prevention of fraud using fraudulent identity documents
- Compliance with the REAL ID Act
- Enhanced reporting and investigative capabilities regarding the identity of new, returning, and out-of-state drivers
- Improved customer service and process efficiency
